

# More than Gifts

End of Year Experience / 2021

# Rethink.

Aligned with the growing need to support social and responsible production, recycling and reutilization, we continuously re-examine the way we approach our product and material selection, manufacturing and print production processes.

Dedicated to sustainability and the development of a responsible collection, we can project our brands and environmental goals whilst aiding the reduction of landfill waste.

*“As we aim for conscious promotions we commit to a responsible process.”*

### **Responsible sourcing and production**

All products are produced in a responsible way and comply with the requirements under EU laws and regulations. Choosing more sustainable materials has been an essential factor during the development of this End of Year collection. Would you like further insight or inspiration? Browse through our extensive More Than Gifts collection and we are sure you will find the perfect gift to convey your brand or marketing message.

### **Social responsibility and Sustainable printing process**

During production and printing we focus on creating a safe and positive working environment. All items are well-constructed, tested and produced with compliant and safe materials. Our printing process requires the safe use of all production inputs, such as chemicals and the control of all production outputs and emissions.

### **Sustainable solutions**

A conscious and meaningful gift. By strongly reducing the use of virgin plastic and rethinking the most efficient way to pack the goods, both individually and for onward distribution shipment, we can reduce waste and influence our environmental footprint. In addition to the emphasis on the usage of recycled materials and material that lend themselves to a recycling process, the distribution of the products is placed in the hands of logistic providers with a clear CO2 emissions offset program.

EMBROIDERY

## The Printing Specialist

From traditional printing to advanced digital systems, we offer a wide range of ways to print your brand on our products, having a perfect control of the whole process.

ROUND LASER

SUBLIMATION

### Screen Printing

Main advantage of screen printing is the unique result you can achieve. It can be applied on a variety of materials but mostly used on fabrics since a larger size can be achieved.

### Pad Printing

Pad printing is a technique where rubber stamps are used to print the logo on the item. With this technique you achieve a sharper finish and a perfect colour matching (PMS) is achievable.

### Ceramic Transfer

The technique of ceramic transfer printing is applied to ceramic promotional cups and items where the logo is printed on a sheet and transferred by water.

### Embossing

Embossing is a popular technique for marking products made of leather, PU or cardboard. The logo is stamped on the material being sunk and making it indelible.

### Embroidery

Embroidery is a very popular technique in products such as caps, textiles or advertising bags where the finishing touch is in the sewn logo with woven threads.

### Laser Engraving

Laser engraving can be applied to items made of natural materials like wood and metals. With laser engraving the result of branding is precise, clean and permanent.

### Digital Transfer

Digital Transfer is one of the most popular methods for full colour logos and designs. This Four Colour Process hits over thousands of colours resulting in a photographic quality decoration.

### Digital Printing

Digital printing is done by placing the product under a four-color digital printer. Compared to the conventional technique it is a more environmentally friendly solution.

### Sublimation

Sublimation is one of the few methods you can print full coloured images onto hard surfaces or polyester coated items. Number of colours is unlimited for complete customized logos.

### Full Colour Round Digital

Combining the technology of UV inkjet digital printing with rotary print capabilities allows us to print full colour images with vivid colours around bottles and other cylindrical items.

### Round Laser

Technique of laser engraving (e.g. wood, metals etc.), coupled with rotary engraving capabilities which allows us to offer engraved design on the circumference of cylindrical items.

**To cover all customers printing needs, we have also in house other specific decoration techniques such us:**

- Doming**
- Digital label**
- Button**
- Digital inlay**
